PROFESSIONAL SUMMARY

Backend Developer skilled in building scalable backend systems, REST APIs, and SQL-based databases using Python frameworks such as Django, FastAPI, and Flask. Strong foundation in DSA, OOP, and SQL databases. Experienced in developing backend projects, optimizing application performance, and writing clean, maintainable, and scalable code.

EDUCATION

- **B.Tech in Computer Science Engineering**
ABES Engineering College (2022-2026) – 72%
- **Vidya Bharati School**
12th Class (2021-2022) – 76%
10th Class (2019-2020) – 82%

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, SQL, C++, C
- **Frameworks & Libraries:** Django, Flask, FastAPI, Streamlit, Pandas, NumPy, SQLAlchemy
- **Databases:** MySQL, SQLite, PostgreSQL, MongoDB
- **Developer Tools & APIs:** Git, GitHub, Docker, REST APIs
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), System Design, DBMS
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Team Collaboration

EXPERIENCE

Personal Project – Secure File Sharing System

(Remote | May 2025 – July 2025)

(Technologies - Python, FastAPI, MySQL, Uvicorn)

- Created a secure file sharing system using **Python, FastAPI, MySQL**, and **Uvicorn** to safely share files.
- Added expiring download links based on time or download count, reducing unauthorized access by **100%**.
- Used **unique tokens (UUID)** and database records to control when links expire or reach their download limit.
- Ensured secure file sharing through request validation and safe file handling using **FastAPI and Python**.

PROJECTS

• Project – Employee Records Portal:

(Technologies - Python, Django, MySQL)

- Implemented a role-based employee management portal using **Python, Django and MySQL** with CRUD operations.
- Designed features for employee records, payroll, attendance, and admin dashboards using **Django views and relational models**.
- Automated record-keeping, reducing manual HR work by **70%** and scaling to manage **1,000+ employee records**.
- Highlighted backend integration, **authentication, and relational database handling**.

• Project – URL Shortener with Analytics:

(Technologies - Python, FastAPI, SQLite, REST APIs)

- Built a URL shortener using **Python, FastAPI and SQLite**, integrated with analytics tracking.
- Added **analytics tracking** (device, location, timestamp), with **FastAPI routers, SQLite schemas**, improving campaign visibility and insights by **80%**.
- Converted long URLs into short clean shareable links with **100% functionality**.
- Demonstrated backend **API design, database integration, and analytics reporting**.

• Project – Data Automation Script:

(Technologies - Python, Pandas, SQLAlchemy, MySQL)

- Developed a **Python** script to **clean and validate CSV/Excel data** using **Pandas**.
- Streamlined insertion of cleaned data into **MySQL** via **SQLAlchemy** with logging and error handling.
- Reduced manual workload by **80%**, ensuring consistency across daily reports.

CERTIFICATIONS & ACHIEVEMENTS

- Python programming | Coursera
- SQL for Data Science | Coursera
- 5-star rated Python coder at HackerRank
- Solved over 250+ problems on LeetCode in Java and Python.
