PROFESSIONAL SUMMARY

Skilled Data Engineer with hands-on experience in Python, SQL, and data processing. Experienced in cleaning, transforming, and organizing data for reports and analysis. Worked on projects involving automation, managing databases, and creating data visualizations. Focused on writing clear, efficient code to build reliable data solutions.

EDUCATION

- **B.Tech in Computer Science Engineering**
ABES Engineering College (2022-2026) – 71%
- **Vidya Bharati School**
12th Class (2021-2022) – 76%
10th Class (2019-2020) – 82%

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C++, C
- **Frameworks & Libraries:** Django, Flask, FastAPI, Streamlit, Pandas, NumPy, Matplotlib
- **Databases:** MySQL, SQLite
- **APIs & Tools:** REST APIs, Git, GitHub, Docker
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP)

EXPERIENCE

Personal Project – Data Automation Script:

(Remote | Aug 2025 Present)

- Developed a Python script to **clean and validate CSV/Excel data** using Pandas.
- Automated insertion of cleaned data into **MySQL** via **SQLAlchemy** with logging and error handling.
- Reduced manual workload by **80%**, ensuring consistency across daily reports.
- Implemented a fully automated workflow with scheduling, allowing the process to run smoothly.

PROJECTS

• Project – Employee Records Portal:

- Created a role-based Employee Management portal using **Python, Django and MySQL** with CRUD operations.
- Implemented features for employee records, payroll, attendance, and admin dashboards.
- Automated record-keeping processes, reducing manual HR work by 70% and scaling to manage 1,000+ employee records.
- Highlighted backend integration, authentication, and relational database handling.

• Project – Secure File Sharing Backend System:

- Developed a backend system using **Python, FastAPI, MySQL, and Uvicorn** to safely share files.
- Added automatic links that expire after a certain time or after a set number of downloads.
- Used unique tokens (UUID) and database records to control when links expire or reach their download limit.
- Includes speed controls, interactive features, and dynamic visuals to make concepts easier to understand.
- Make sure file sharing was secure and reduced the risk of misuse.

• Project – Sales Insights Report Generator:

- Built a **Python** tool using **Pandas and Matplotlib** to analyze sales data from **CSV/Excel** files and generate easy-to-read summaries.
- Calculated important metrics like total sales, top products, top customers, and monthly trends.
- Created visual charts to show trends clearly and make insights easier to understand.
- Helped reduce time spent on manual reporting and provided quick information for decision making.

CERTIFICATIONS & ACHIEVEMENTS

- Python programming | Coursera
- SQL for Data Science | Coursera
- C programming | HackerRank
- 5-star rated Python coder at HackerRank
- Solved over 100+ problems on LeetCode in Java and Python.
